New Jersey Milk Production up 3.1 Percent from 2014

The quarterly production of milk for New Jersey during the 1st quarter in 2015 was 33 million pounds, 3.1 percent above the 2014 1st quarter, according to Bruce Eklund, State Statistician of the USDA's National Agricultural Statistics Service, New Jersey Field Office.

Production per cow in New Jersey averaged 4,715 pounds for the 2015 1st quarter, 145 pounds above the 1st quarter in 2014.

The average number of milk cows on farms in New Jersey during the 1st quarter in 2015 was 7,000 head, unchanged from the 1st quarter in 2014.

The complete Annual Milk Production report and all other NASS reports are available online at www.nass.usda.gov.
